PROFESSIONAL EXPERIENCE

Software Professional

SN INFOSERV SOFTWARE SOLUTIONS | April 2023 – Present

- I have played a multi-role in both front-end and backend development, primarily focusing on creating E-commerce websites and billing systems for a website development company. My responsibilities included developing RESTful APIs, along with designing and implementing features for both the client-side and server-side functionalities. I have also utilized Photoshop for basic design tasks.
- In terms of programming languages, I have designed projects using HTML, CSS, and JavaScript, with React for front-end development. For backend development, I have proficiency in PHP and Java.
- I have consistently met client requirements within short timeframes, ensuring customer satisfaction.

Html Executive

SiLVER DOLLER TECHNOLOGY | Jan 2022 – October 2022

- I have working on web development. Designing websites with HTML and CSS, debugging errors, and ensuring responsiveness are all essential skills in the website.

PERSONAL PROJECTS

- Early stage detection of parkinson's diseases using machine learning.
- Music app using react, Reastful api and springboot.
